HIGH PERFORMANCE LIGHTING

LINEAR-18

The Linear-18 is an ECE approved, road-legal versatile and economical auxiliary lighting solution which provides a significant upgrade when compared with any OE headlamps. The Linear-18 is ideal for passenger vehicles, where regulations allow for a single lamp to be connected direct to the standard high beams, and in particular where the lamp is being mounted low down at the front of the vehicle. Utilising highly efficient 3W LEDs, the Linear-18 delivers 6,750 lumens, and 1 Lux to 428m, impressive performance considering the lamp only consumes minimal power at 63W and with a current draw of 4.4Amps.
